Profile

I am an aspiring Full Stack Web Developer with experience creating dynamic and user-friendly web applications. I have experience working on both front-end and back-end development. I also have one year of experience in IT networking, which gives me a strong foundation in system connectivity and troubleshooting. I am passionate about technology and always strive to improve my skills and grow to the next level.

Employment History

MyPointMarketing -ITSupport

November 2022—February 2023

- Authored several guidelines and documentation to support ongoing customer requests and tickets.
- Delivered clear and concise workarounds for dedicated customer and service calls, including configuration and customization based on specific customer needs.
- Troubleshot and managed a wide range of software, particularly accounting-related applications used in daily enterprise operations.

Taknet systems -IT Engineer

March 2023—July 2024

- Recommended optimal server or barebone system solutions, offering in-depth insights into the most ideal server configurations based on operational requirements.
- Installed servers with a wide array of components, ensuring transparent and integrity-driven system setups.
- Troubleshot a majority of complex and elusive system configuration issues critical to the server's daily operations.
